

Anthony Gruber, Ph.D.

 <https://agrubertx.github.io> |  adgrube@sandia.gov |  +1-512-658-9672

Albuquerque, NM 87111

EDUCATION

Ph.D., Mathematics , Texas Tech University, Lubbock, TX	2019
M.S., Mathematics , Texas Tech University, Lubbock, TX	2017
B.G.S., Music Performance/Chemistry/Mathematics , Texas Tech University, Lubbock, TX	2015

PROFESSIONAL EXPERIENCE

Sandia National Laboratories Sep 2022–present
John von Neumann Fellow Albuquerque, NM

- Funded half-time for self-directed research on structure-informed surrogate modeling with emphasis on nonintrusive and variationally consistent methods.
- Remaining time funded by the DOE Early Career Program (PI Nat Trask) on projects related to scientific machine learning and data-driven exterior calculus on graphs.
- JvN Fellowship funded by the DOE ASCR applied mathematics research program in conjunction with the Sandia LDRD program.

Florida State University Jan 2021–Aug 2022
Postdoctoral Research Associate Tallahassee, FL: stationed in Columbia, SC

- Advised by Prof. Max Gunzburger on the design of algorithms for function approximation and reduced-order modeling related to the simulation of ocean dynamics.
- Further advised on related work by Prof. Lili Ju and Prof. Zhu Wang at the University of South Carolina.
- Funded by DOE grant DE-SC0020418: Efficient and Scalable Time-Stepping Algorithms and Reduced-Order Modeling for Ocean System Simulations.

Texas Tech University Aug 2019–Dec 2020*
Assistant Professor of Practice Lubbock, TX: stationed in San José, Costa Rica

- Mathematics program director at the TTU satellite campus in San José.
- Taught a 2-2 load of mathematics courses, conducted research, and coordinated with TTU faculty and administration state-side to further the University mission in Costa Rica.
- (*) Remained employed on unpaid leave until August 2022.

Oak Ridge National Laboratory*NSF Graduate Research Fellow*

June 2018–Aug 2018

Oak Ridge, TN

- Advised by Dr. Robert Bridges on a project called Active Manifolds (see publications below) applying geometric methods to data science problems involving high-dimensional function approximation.
- Produced mathematical and computational results specially selected for presentation to the leaders of the Computing and Computational Sciences Division at ORNL.
- Funded through the NSF Mathematical Sciences Graduate Internship (MSGI) program.

Texas Tech University*Graduate Part-Time Instructor*

Aug 2015–Aug 2019

Lubbock, TX

- Served as instructor of record for a 2-2 load of mathematics courses each year.
- Responsible for all aspects of instruction, including writing/delivering lectures and assigning homework, as well as writing and grading exams.
- Funded through scholarships/endowments at TTU.

University of Texas at Dallas*NSF Research Intern*

May 2014–Aug 2014

Richardson, TX

- Worked under Prof. Manuel Quevedo to design, construct, and characterize TiSi and CrB₂-Si-SiC thin-film resistors (TFRs) using a combination of lithography, x-ray photoelectron spectrometry, and Hall-effect measurements.
- Generated data that facilitated the identification of a superior ratio of Ti:Si, thereby improving resistivity of previous TFRs by 30%.
- Funded through the NSF Research Experiences for Undergraduates (REU) program.

RESEARCH FUNDING

PI, “Learning Operators for Structure-Informed Surrogate Models”, Sandia LDRD award.

2022-2024

Awardee, NSF Mathematical Sciences Graduate Internship

2018

Awardee, NSF REU Internship

2014

TEACHING

Courses Taught

Dates:

- | | |
|--|---|
| - “Intro to Data Analytics”, (general knowledge, TTU-CR) | short course, Fall 2020 |
| - “College Algebra”, (100 level, TTU) | one section, Summer 2015 |
| - “Calculus III with Applications”,
(200 level, TTU) | large section, Fall 2016
two sections, Fall 2017
virtual section, Summer 2019 |
| - “Calculus III with Applications”,
(200 level, TTU-CR) | one section, Fall 2019
one section, Spring 2019
one section, Fall 2020 |
| - “Higher Math for Engineers
and Scientists I”, (300 level, TTU) | two sections, Spring 2017
large section, Spring 2018
virtual section, Fall 2018 |
| - “Higher Math for Engineers
and Scientists I”, (300 level, TTU-CR) | one section, Spring 2020 |
| - “Intro to Critical Reasoning
and Proof”, (300 level, TTU-CR) | one section, Fall 2019 |
| - “Higher Math for Engineers
and Scientists II”, (300 level, TTU) | one section, Spring 2019 |
| - “Foundations of Algebra I, (300 level, TTU-CR) | one section, Fall 2020 |
| - “Advanced Calculus I, (400 level, TTU-CR) | one section, Fall 2020 |

RESEARCH MENTORING

Informal Mentoring

- *Roxana Pohlmann* (9/2023-1/2024), Visiting student intern, currently Ph.D. student at U. of Vienna.
Project: Reduced-order models to accelerate injection molding.
- *Arturo Rodriguez* (5/2023-8/2023), Grande CARES summer intern, currently Ph.D. student at U. of Texas El Paso.
Project: Partition of unity physics-informed neural networks (POU-PINNs).
- *Edward Huynh* (5/2023-8/2023), CSRI summer intern, currently Ph.D. student at U. of Arizona.
Project: Obtaining inverse Sobolev-type inequalities for tanh neural networks.

Formal Mentoring

- Ph.D. committee member: *Madusha Atampalage* (graduated Aug. 2021), Texas Tech University.
Thesis Title: Topics in Minimal Surfaces and Applications.

PROFESSIONAL SERVICE

Conferences/Minisymposia Organized

3. Co-organizer, Minisymposium, "Geometric mechanics formulations and structure-preserving discretizations for continuum mechanics and kinetic models", 16th World Congress on Computational Mechanics, July 21-26, 2024.
2. Co-organizer, Minisymposium, "Geometric mechanics formulations and structure-preserving discretizations for continuum mechanics", 17th U.S. National Congress on Computational Mechanics, July 26-30, 2023.
1. Organizer, session #54, "Elastic curves and surfaces with applications and numerical representations", 18th International Conference of Numerical Analysis and Applied Mathematics, Sep 17-23, 2020.

Reviewed For

- | | |
|---|---|
| - <i>Computer Methods in Applied Mechanics and Engineering</i> | - <i>Numerical Methods for Partial Differential Equations</i> |
| - <i>Journal of Computational Physics</i> | - <i>Journal of Geometry and Physics</i> |
| - <i>Journal für die reine und angewandte Mathematik (Crelle's Journal)</i> | - <i>Electronic Journal of Statistics</i> |
| - <i>Geoscientific Model Development</i> | - <i>SIAM Journal on Scientific Computing</i> |
| | - <i>Journal of Scientific Computing</i> |

Other Service

- Reviewer, CSRI summer student proceedings, 2023-present.
- Panel Member, Alumni Panel (virtual), NSF-MSGI Virtual Symposium. (Aug. 23, 2023)
- Panel Member, Early Career Panel (virtual), Association of Women in Mathematics, Texas Tech University, Lubbock, TX. (Apr. 21, 2022)

TECHNICAL EXPERTISE

Computer Languages

- | | |
|----------------------------|------------------------------------|
| - Python (expert) | - Mathematica (limited experience) |
| - C++ (some experience) | - Java (minimal experience) |
| - MATLAB (some experience) | |

Laboratory Experience

- Chromatography: TLC, HPLC, GC, column.
- Deposition: CSS, PL.
- Acid/base titration; chemical distillation/recrystallization.
- Bomb calorimetry; lithography; Hall voltage measurement.
- Class 1000 cleanroom experience.

PROFESSIONAL PRESENTATIONS

Invited External Presentations

13. “Data-driven dynamical systems with structural guarantees” (virtual), S. Scott Collis Advanced Modeling & Simulations seminar series, Rio Grande Consortium for Advanced Research on Exascale Simulation. (50 min; Nov. 10, 2023)
12. “Data-driven dynamical systems with structural guarantees” (virtual), Applied Mathematics and Machine Learning seminar, Texas Tech University. (50 min; Nov. 8, 2023)
11. “Property-preserving model reduction for conservative and dissipative systems” (virtual), Numerical Analysis of Galerkin ROMs seminar series, the ARIA project, INRIA, Bordeaux, France. (50 min; Oct. 10, 2023) Available [here](#).
10. “Data-driven surrogate models for bracket-based dynamical systems”, Minisymposium on Data-driven Methods for Circuits and Devices, 2nd IACM Mechanistic Machine Learning and Digital Engineering for Computational Science Engineering and Technology, El Paso, TX. (20 min; Sep. 27, 2023)
9. “Property-preserving model reduction for Hamiltonian and metriplectic systems” (virtual), Chair for Dynamics, Control, and Numerics, FAU Erlangen-Nürnberg, Bavaria, Germany. (50 min; May 31, 2023)
8. “Mathematics in different settings” (virtual), Hong Duc University, Thanh Hòa, Vietnam. (30 min; May 20, 2023)
7. “Energetically consistent model reduction for Hamiltonian and metriplectic systems”, CRUNCH webinar (virtual), Brown University, Providence, RI. (60 min; Dec. 9, 2022) Available [here](#).
6. “Convolutional neural networks for data compression and reduced-order modeling”, Minisymposium on machine learning for large-scale scientific data analytics, SIAM Mathematics of Data Science, San Diego, CA. (25 min; Sep. 28, 2022)
5. “Computing quasiconformal mappings between immersed surfaces”, AMS Fall Central Sectional, University of Texas at El Paso, El Paso, TX. (20 min; Sep. 17, 2022)
4. “Calculus in computer graphics and data science” (virtual), Mathematics Seminar Series, Cameron University, Lawton, OK. (50 min; Oct 19, 2021)

3. “Convolutional neural networks for data compression and reduced order modeling”, SIAM SEAS special session on Deep Learning Methods for Data Driven Models, Auburn University, Auburn, AL. (30 min; Sep 18, 2021)
2. “Codazzi tensors with parallel mean curvature” (virtual), AMS special session #1159, Geometry of Submanifolds and Integrable Systems, University of Texas at El Paso, El Paso, TX. (25 min; Sep. 12, 2020)
1. “Stationary surfaces for curvature functionals”, 63rd Texas Geometry and Topology Conference (virtual), Texas Tech University, Lubbock, TX. (50 min; April 23, 2020)

Contributed Presentations

7. “Reversible and irreversible bracket-based dynamics for deep graph neural networks”, Advances in Neural Information Processing Systems, New Orleans, LA. (poster; Dec. 10-16, 2023)
6. “Variational Consistency in Model Reduction for Conservative and Dissipative Systems”, Minisymposium on Data-Driven Methods—Solids, A Conference Celebrating the 80th Birthday of Thomas J.R. Hughes, Austin, TX. (Oct. 23, 2023)
5. “Canonical and Noncanonical Hamiltonian Operator Inference”, Minisymposium on Geometric Mechanics Formulations and Structure-Preserving Discretizations, 17th U.S. National Congress on Computational Mechanics, Albuquerque, NM. (25 min; July 26, 2023)
4. “Canonical and Noncanonical Hamiltonian Model Reduction”, Workshop on Establishing Benchmarks for Data-Driven Modeling of Physical Systems, University of Southern California, Los Angeles, CA. (30 min; April 6, 2023)
3. “Geometric flows via finite element methods” (virtual), Elasticity group, Texas Tech University, Lubbock, TX. (50 min; Dec 2, 2020)
2. “Quaternionic remeshing during surface evolution” (virtual), 18th International Conference of Numerical Analysis and Applied Mathematics, Rhodes, Greece. (30 min; Sep 17, 2020)
1. “Willmore-stable minimal surfaces” (virtual), 18th International Conference of Numerical Analysis and Applied Mathematics, Rhodes, Greece. (30 min; Sep 17, 2020)

Internal and Other Presentations

16. “SNL progress highlights: data-driven couplings (RT3.1) and preservation of geometric structure in ROM (RT2.2)”, M2dt MMICC all-hands meeting, Oden Institute, University of Texas at Austin, Austin, TX. (20 min; Oct. 25, 2023, w/ Irina Tezaur)
15. “Data-Driven Surrogate Models for Bracket-Based Dynamical Systems”, Sandia SEA-CROGS MMICC meeting, Albuquerque, NM. (50 min; Oct. 11, 2023)
14. “Tensor methods for metriplectic systems” (virtual), Sandia M2dt MMICC meeting, Albuquerque, NM and Livermore, CA. (25 min; May 16, 2023)

13. “ROM ideas for Hodge-de Rham systems” (virtual), Sandia M2dt MMICC meeting, Albuquerque, NM and Livermore, CA. (25 min; Dec. 6, 2022)
12. “Hamiltonian Operator Inference with Examples” (virtual), Sandia M2dt MMICC meeting, Albuquerque, NM and Livermore, CA. (25 min; Nov. 1, 2022)
11. “Structure-preserving ROM ideas” (virtual), Sandia M2dt MMICC meeting, Albuquerque, NM and Livermore, CA. (25 min; Oct. 18, 2022)
10. “Variationally consistent model reduction”, Sandia Fellows Day, Albuquerque, NM. (20 min; Aug 29, 2023)
9. “Artificial neural networks for dimension reduction and reduced-order modeling”, Applied Mathematics group, Texas Tech University, Lubbock, TX. (50 min; Sep 30, 2021)
8. “Some nonlinear PDEs in computer graphics and data science”, Mathematics Colloquium Series, Texas Tech University, Lubbock, TX. (50 min; Sep 29, 2021)
7. “Optimal quasiconformal mappings with prescribed boundary” (virtual), Probability, Geometry, and Mathematical Physics group, Texas Tech University, Lubbock, TX. (50 min; April 7, 2021)
6. “Geometric flows via finite element methods” (virtual), Elasticity group, Texas Tech University, Lubbock, TX. (50 min; Dec 2, 2020)
5. “Variational Aspects of Curvature Functionals”, Elasticity group, Texas Tech University, Lubbock, TX. (50 min; Sep 2, 2020)
4. “Computing stationary solutions to p-Willmore flow”, Applied Mathematics group, Texas Tech University, TX. (50 min; April 22, 2020.)
3. “A conformally-adjusted Willmore flow of closed surfaces”, Applied Mathematics group, Texas Tech University, Lubbock, TX. (50 min; May 8, 2019)
2. “Curvature functionals and p-Willmore energy”, Analysis group, Texas Tech University, Lubbock, TX. (50 min; April 29, 2019)
1. “Active Manifolds: A geometric approach to dimension reduction for sensitivity analysis”, Computational and Applied Mathematics group, Oak Ridge National Laboratory, Oak Ridge, TN. (50 min; August 1, 2018)
